SUMMARY

I am a hardworking, organized, and passionate programmer, with good sense of responsibility. I have a broad knowledge in software development, web development and AI of the current trends in the IT industry. I am looking forward to be part of a progressive organization. I will carry out any given task in accordance with the rules and ethical standards.

WORK EXPERIENCE

- Backend Developer Intern (OJT)**
Office of the Program Chair – BS Information Technology, PRMSU Iba
Dec 2025 - May 2026
 - Developed an Automated Proposal Review and Processing System to streamline submission, review, and approval workflows.
 - Built backend services using Django, including REST APIs, role-based access, and workflow management.
 - Integrated PostgreSQL database on AWS for secure and scalable data storage.
 - Collaborated with the team using Git for version control and efficient development.
- Systems & Administrative Support Intern (Office Assistant)**
Office of the Program Chair – BS Information Technology, PRMSU Iba
Jun 2025 - Jul 2025
 - Supported student lifecycle management using SIAS, including record verification, enrollment processing, and data auditing.
 - Migrated paper-based records into digital systems using Google Workspace and Excel.
 - Developed automated reporting templates (VLOOKUP, Pivot Tables) to improve efficiency.
 - Provided IT support and maintained system data accuracy through validation and cleaning.
- Data Analytics & Admissions Support Intern (Office Assistant)**
Office of the Program Chair – BS Information Technology, PRMSU Iba
Apr 2025 – May 2025
 - Analyzed PCET datasets to support student admission and placement decisions.
 - Automated scoring workflows using Excel and Google Sheets, reducing manual processing time.
 - Ensured data privacy and handled sensitive student information securely.
 - Digitized admission records to improve accessibility and retrieval efficiency.
- IT Support & Web Development Intern (Office Assistant)**
Office of International Linkages – PRMSU Iba
Jul 2024 - Aug 2024
 - Developed a static website using HTML, CSS, and JavaScript to digitize departmental information.
 - Performed hardware and software maintenance, including system optimization and PC reformatting.
 - Implemented file backup solutions to ensure data integrity and prevent loss.
 - Coordinated with departments for document processing and improved communication workflows.

EVENTS & PROJECTS

- Nutrition & Fitness Tracking App (Personal Project)**
Feb 2026 - May 2026
 - Developed a calorie tracking app with custom food creation and reusable nutrition data
 - Integrated Gemini AI, barcode, and image-based scanning for automated food analysis
 - Building workout tracking and progress monitoring features
- BERT-Based Citizen Feedback Decision Support System (Supervised Research Project) LGU Iba**
Jan 2026 – Feb 2026
 - Built Flask REST APIs for real-time citizen feedback processing
 - Fine-tuned and compared BERT models to improve classification performance
 - Collaborated on an end-to-end system with admin dashboard and kiosk interface
- ProctorVision: AI-Powered Laboratory Exam Monitoring System (Capstone Project) PRMSU – CCIT**
Jan 2025 – Nov 2025
 - Developed an AI-based proctoring system to detect cheating behaviors during laboratory exams.
 - Developed a React.js and Flask full-stack app with WebRTC and MediaPipe for real-time facial detection
 - Trained a MobileNetV2 CNN model achieving 96.85% accuracy in classification.
- AI-Powered Blockchain Wallet Monitoring System (Hackathon Project) RAITE – NEUST Sumacab Campus**
Sept 2025 – Oct 2025
 - Built a Flask backend integrated with Ethereum Layer 2 smart contracts for suspicious wallet detection
 - Designed and presented an AI-assisted monitoring solution during a competitive hackathon
- Sustainable Volunteer Web Platform (Hackathon Project) RAITE – Angeles University Foundation**
Oct 2024
 - Built a full-stack platform using React.js and Express.js for managing environmental volunteer events
 - Integrated decentralized features via ICP and delivered within a fast-paced two-week development cycle

EDUCATION

- Primary:** • Santa Cruz Elementary School
Jun 2009 - May 2015
- Secondary:** • Benigno S. Aquino National High School JHS: COOKERY NC II SHS: Computer System Servicing NC II
SHS: With High Honors
Jun 2015 - Apr 2022
- Tertiary:** • President Ramon Magsaysay State University Course: Bachelor of Science in Information Technology
Consistent Dean's Lister (1st Year – 4th Year) - Cum Laude Candidate (GWA: 1.4)
Sep 2022 - July 2026

SKILLS

- Programming Languages:** C, C++, Java, Python, PHP, JavaScript, TypeScript
- Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP)
- Frameworks & Libraries:** Django, Flask, Express.JS, React.JS, ReactNative Tailwind, Bootstrap
- Database Systems:** MySQL, PostgreSQL, Microsoft SQL Server
- Artificial Intelligence & Machine Learning:** CNNs, Computer Vision, Supervised & Unsupervised Learning
- Tools & Technologies:** Git, Github, REST APIs, Web Deployment, Postman, AWS Cloud Database
